

# Application for New Residential Gas Service

Thank you for applying for service. Please complete this application (print or type), sign your name below and mail to:

- Metropolitan Utilities District, Builder and Contractor Services, 1723 Harney St., Omaha, NE 68102-1960; fax to 402.504.7984, or
- Drop off the application at Builder and Contractors Services, 3100 S. 61 Ave., Omaha. Questions? Call 402.504.7987 or e-mail: customer\_service@mudomaha.com.

Service address (street, city, zip): \_\_\_\_\_

Legal description of the property: \_\_\_\_\_

Application is being made by: \_\_\_\_\_

Phone: home \_\_\_\_\_ work \_\_\_\_\_

Mailing address, if other than service address (street, city, state, zip): \_\_\_\_\_

The house has \_\_\_\_\_ **total square feet.** (Homes larger than 3,500 square feet require a Btu load report. Call 402.504.7987.)

The length of service from property line to the meter is \_\_\_\_\_ feet.

Install the gas meter on the: \_\_\_\_\_ north \_\_\_\_\_ south \_\_\_\_\_ east \_\_\_\_\_ west side of the house.

Please mark the gas meter location on the foundation or place a grade stake.

M.U.D. will install a 2-lb. meter if the main has adequate pressure. If the main does not have adequate pressure, M.U.D. will deliver main pressure (less than or equal to 7 inches water column). Gas services are installed as soon as the construction schedule permits. The area where service is to be installed must be to final grade and clear of all obstructions with gas meter location properly marked. Attach a drawing if you feel it will help.

\_\_\_\_\_ Check if natural gas is not the only energy source used for space heating (*See number 1 under Statement of Conditions*).

Remarks: \_\_\_\_\_

## Statement of Conditions

I understand this application is to install the gas service pipe and meter. The first 100 feet of service will be installed at no cost provided that:

1. Natural gas is the only energy source used for space heating. If natural gas is not the only energy source used for space heating, a charge as listed in the Billing Price Book is due at the time of application.

I understand if it is later discovered that an additional or alternative energy source is being used at the service address for space heating (i.e., electric furnace, air or ground-source heat pump, etc.), the charge listed in the Billing Price Book will be assessed to the applicant.

2. The gas meter must be installed within six months from the date the service is installed. If it isn't, I will be billed the cost listed in the Billing Price Book to install the first 100 feet of service.
3. If more than 100 feet of pipe is needed, as measured from the property line to the meter location, I will be billed the cost listed in the Billing Price Book for each foot in excess of 100 feet. Amount to be determined by summer or winter installation.
4. I understand there is a cost, listed in the Billing Price Book, to locate a gas meter at the rear of the house.

5. All pressure testing of interior piping shall follow the requirements of the National Fuel Gas Code. Residential pressure tests and record keeping is the responsibility of the contractor.
6. Excess flow valves shall be installed at no charge on new or replaced residential gas services effective January 1, 2008. An excess flow valve automatically shuts off the flow of gas if the service breaks or is severed. Excess flow valves conform to performance standards established by the federal government in the Pipeline Safety Regulations.
7. I will call Customer Service 402.554.6666 when ready for gas meter installation and billing information.

I have read and understand the Statement of Conditions above. By signing this application, I agree to these conditions and all M.U.D. Gas Rules and Regulations.
