

METROPOLITAN UTILITIES DISTRICT

January 7, 2025

Dear Contractor,

The Metropolitan Utilities District (M.U.D.) is proud to be your community partner and provider of efficient natural gas and high-quality water for the metro area.

Recently, the District performed a comprehensive rate study. This effort ensures rates and fees remain equitable and consistent across all customer classes. One key item that was reviewed are the impact fees collected. Impact fees are an essential part of how each new connection contributes to the overall operation of our water distribution system. These contributions go towards vital infrastructure such as reservoirs and pump stations, which support new growth. As the metro area expands and demand increases, these fees allow us to fund a major portion of growth-related costs without incumbering existing customers. This ensures a safe and reliable drinking water supply for all customer-owners.

Additionally, impact fees help support system development by funding essential upgrades like oversizing, enlarging, and reinforcing water mains in developing areas. This proactive approach enables us to meet the needs of new communities while maintaining reliable service for all customers.

We understand these fees are an important factor in your planning and budgeting. We are here to answer any questions or provide additional details about these updates. Your partnership helps make these improvements possible, and we appreciate the role you play in serving our growing community.

Best regards,

Brenda Zapata
